Division of Water Pollution Control ANNUAL FACILITY INSPECTION REPORT

for NPDES Permit for Storm Water Discharges from Separate Storm Sewer Systems (MS4)

This fillable form may be completed online, a copy saved locally, printed and signed before it is submitted to the Compliance Assurance Section at the above address. Complete each section of this report.

Report Period: From March, 2024 To March, 2025

Permit No. ILR40 0490, 0491

MS4 OPERATOR INFORMATION: (As it appears on the current permit)

Name: Skokie Consolidated Drainage District Mailing Address 1: 9 North County Street

Mailing Address 2: County:

City: Waukegan State: IL Zip: 60085 Telephone: 847-244-0770

Contact Person: Bryan Winter Email Address: bwinter@fuquawinter.com
(Person responsible for Annual Report)

Name(s) of governmental entity(ies) in which MS4 is located: (As it appears on the current permit)

City/Village: Park City, N. Chicago, Waukegan, Gurnee Townships: West Deerfield, Libertyville, Warren,
Highland Pk, Lk Forest, Lk Bluff, Mettawa, Highwood Moraine, Shields. Village of Green Oaks

THE FOLLOWING ITEMS MUST BE ADDRESSED.

A. Changes to best management practices (check appropriate BMP change(s) and attach information regarding change(s) to BMP and measurable goals.)

- | | | | |
|--|--------------------------|---|--------------------------|
| 1. Public Education and Outreach | <input type="checkbox"/> | 4. Construction Site Runoff Control | <input type="checkbox"/> |
| 2. Public Participation/Involvement | <input type="checkbox"/> | 5. Post-Construction Runoff Control | <input type="checkbox"/> |
| 3. Illicit Discharge Detection & Elimination | <input type="checkbox"/> | 6. Pollution Prevention/Good Housekeeping | <input type="checkbox"/> |

B. Attach the status of compliance with permit conditions, an assessment of the appropriateness of your identified best management practices and progress towards achieving the statutory goal of reducing the discharge of pollutants to the MEP, and your identified measurable goals for each of the minimum control measures.

C. Attach results of information collected and analyzed, including monitoring data, if any during the reporting period.

D. Attach a summary of the storm water activities you plan to undertake during the next reporting cycle (including an implementation schedule.)

E. Attach notice that you are relying on another government entity to satisfy some of your permit obligations (if applicable).

F. Attach a list of construction projects that your entity has paid for during the reporting period.

Any person who knowingly makes a false, fictitious, or fraudulent material statement, orally or in writing, to the Illinois EPA commits a Class 4 felony. A second or subsequent offense after conviction is a Class 3 felony. (415 ILCS 5/44(h))

This MS4 Program during the reporting year 3/2024-3/2025 for this Annual Facility Inspection Report:

- MS4 did not make any changes to Best Management Practices identified in the SWMP or the Notice of Intent for Permits No. ILR40 0490 & 0491.

Part B. MS4 Status of Compliance with Permit Conditions, Year 22

Stormwater Management Activities, Year 22

Please note that IEPA issued a new version of its General NPDES Permit No. ILR40 (Permit), effective on March 1, 2016. On behalf of all MS4s within the county, SMC performs activities related to each of the six minimum control measures which are described in detail in the SWMP. These BMPs, implemented at the county level, make significant strides in achieving the statutory goal of reducing the discharge of pollutants to the MEP as watershed boundaries are not constrained by municipal borders.

- The SWMP for this MS4 Program can be viewed at the following link: <https://www.gha-engineers.com/ms4/documentation/>
- The previous five years of Annual Reports for this MS4 Program can be viewed at the following link: <https://www.gha-engineers.com/ms4/documentation/>

In response to the new ILR40 permit, effective March 1, 2016, the QLP issued a revised SWMP template in November of 2016 (near the end of Year 14). During Year 17, the MS4 reviewed and revised its SWMP. The stormwater management activities that the MS4 performed during Year 17, including your MS4 program BMPs and measurable goals, are described in detail in the revised SWMP. A copy of the annual tracking form is included at the end of Part B of this report.

A. Public Education and Outreach

Measurable Goal(s):

- Implement BMPs and track progress of BMP implementation, as described in the SWMP, including: ensure MS4 documents are posted to website, support Lake County SMC outreach efforts, and promote BMPs to residents.

Year 22 MS4 activities:

- The MS4 continues to implement the BMPs described in its SWMP and listed above, and to track progress in implementing its stormwater management program.

B. Public Participation/Involvement

Measurable Goal(s):

- Implement BMPs and track progress of BMP implementation, as described in the SWMP, including: participate in stakeholder meetings (watershed groups, Municipal Advisory Council), present the Annual Report to the District Board at a public meeting, identify Environmental Justice areas, publicize District contact information, log and investigate illicit discharges reported by residents.

Year 22 MS4 activities:

- The MS4 continues to implement the BMPs described in its SWMP and listed above, and to track progress in implementing its stormwater management program.
- storm sewer and outfalls are identified with priority outfalls identified and water quality monitoring ongoing.

C. Illicit Discharge Detection and Elimination

Measurable Goal(s):

- Implement BMPs and track progress of BMP implementation, as described in the SWMP, including: Assist SMC the WDO, Assist SMC the District's "Illegal Discharges" and "Stormwater Management" Ordinances, perform annual dry-weather inspections of the District's outfalls, follow illicit discharge reporting procedures (listed in the SWMP), notify pipe owner of illicit discharge concerns, and track all illicit discharges.

Year 22 MS4 activities:

- The MS4 continues to implement the BMPs described in its SWMP and to track progress in implementing its stormwater management program.
- storm sewer and outfalls are identified with priority outfalls identified

D. Construction Site Runoff Control

Measurable Goal(s):

- Implement BMPs and track progress of BMP implementation, as described in the SWMP
- Assist SMC in ensuring that all applicable developments are in compliance with the WDO. .

Year 22 MS4 activities:

- The MS4 continues to implement the BMPs described in its SWMP and to track progress in implementing its stormwater management program.
- The MS4 continues to Assist SMC the WDO.

E. Post-Construction Runoff Control

This does not apply to the MS4 as they do not own any facilities and/or machinery.

F. Pollution Prevention/Good Housekeeping

This does not apply to the MS4 as they do not own any facilities and/or machinery.

Stormwater Management Program Assessment, Year 22

The MS4 revised their SWMP to coincide with the March 2016 ILR40 permit. As described in the revised SWMP there are extensive monitoring efforts already underway across the County, refer to Part C of this report for additional information. The QLP section of the report describes the Status of Lake County waters using information gathered by active workgroups and the Lake County Health Department along with a discussion on TMDL status within the County. The Status of Lake County Waters provides insight as to the overall effectiveness of countywide efforts to improve water quality. As an active MS4 within the County, the countywide findings reflect the individual efforts of each MS4. Additionally, the SWMP identified impaired waters based on the July 2016 303(d) list. The inclusion or exclusion of water bodies on the IEPAs 303(d) list, published bi-annually, is a direct reflection of the program's effectiveness.

| Annual SWMP Tasks | | | | | |
|-------------------|---|----------------|---|---------------------|---|
| BMP | Task | Resp. Party | Date Compl'd | SWMP Section | Comments |
| A.6 | Post NOI on website | GHA | 2/26/2021 | 3.2.B | |
| A.6 | Post SWMP on website | GHA | 2016 | 3.2.B | |
| A.6 | Post Annual Report on website | GHA | 5/31/25 | 3.2.B | |
| B.4 | Present Annual Report to Board during open meeting | GHA | 1/8/2025 | 3.3.B | |
| C.1 | Update outfall map (new permits, outfall inventory updates) | GHA | May 2024 | 1.4.B, 3.4.D.3.c | |
| C.1 | Inspect for "new" outfalls every 5 years | GHA | As needed | 1.4.B | |
| C.3, C.7 | Pre-screen 100% of outfalls (20% per year or 100% within every 5-yrs) | GHA | 9/2/24 | 3.4.D.2.a | |
| C.3, C.8 | Inspect all high priority outfalls (outfall IDs: 56, 54, 69) | GHA | 9/2/24 | 3.4.D.2.b | No potential illicit discharges identified. |
| C.6 | Review the results of the screening program. Include assessment in Part B of the Annual Report. | GHA | 5/28/25 | 4.2 | |
| C.7 | Inspect and clean catch basins, Document. | Municipalities | N/A – pipes are responsibilities of municipalities/township | 3.7.A.2.b | |
| E.6, E.7 | Consider public implementation of watershed plan recommendations as part of fiscal planning/budgeting | District | Ongoing | 3.6.D, 3.6.E | |
| F.1 | Assist SMC employees to attend all relevant training sessions offered by the QLP and other entities on topics related to the goals/objectives of the SWMP. | District | Ongoing | 3.7.C | Municipal stormwater pollution prevention training on 5/30/19 |
| F.2 | Inspect and recondition spreaders and spinners. Install these items onto snow removal vehicles, performing test operations, calibrating distribution rates per National Salt Institution Application Guidelines, and conducting better driver training. | N/A | N/A, District does not have facilities nor own machinery | 3.7.A.4.a | |
| A-F | Review Program, include finding in annual report | GHA | 5/28/25 | 4.2 | |

*Annual Facility Inspection Report
Skokie Consolidated Drainage District
Permit Year 22: Mar. 2024 to Mar. 2025*

| | | | | | |
|-----|---|----------|---------|-------|-------------------------------------|
| B.6 | Evaluate SWMP. Major highlights and deficiencies should be noted annually, and the plan revised accordingly on a minimum 5-yr basis, or as necessary. | GHA | Ongoing | 4.2.C | |
| | Comply with monitoring program commitments, describe in Annual Report | District | Ongoing | 4.1 | No water quality issues identified. |

Part C. MS4 Information and Data Collection Results, Year 22

Annual Monitoring and Data Collection, Year 22

Information and data that the MS4 collected to meet the monitoring requirement of the version of IEPA's General NPDES Permit No. ILR40 that applied to the reporting period are summarized below.

The MS4 revised their SWMP to coincide with the March 2016 ILR40 permit. As described in the revised SWMP there are extensive monitoring efforts already underway across the County. The MS4 participates in the Fox River Study Group (FRSG), the Flint Creek/Spring Creek Watershed Partnership, and supports Lake County Health Department (LCHD) efforts. The QLP section of the report describes the status of Lake County waters using information gathered by these workgroups, the LCHD and IEPA. The following is a brief summary of the efforts described in more detail in the SWMP.

- The LCHD Ecological Services Department has been collecting water quality data on Lake County lakes since the late 1960s. Since 2000, 176 different lakes each year have been studied and data collected on temperature, dissolved oxygen, phosphorus, nitrogen, solids, pH, alkalinity, chloride, conductivity, water clarity, the plant community and shoreline characteristics. Lake summary reports can be found ([URL: URL hyperlink](#)).
- Inland Beaches are monitored bimonthly from May to September by Lake County Health Department's Ecological Services Department. Bacteria concentrations at inland beaches and recreational areas resulting in high concentrations of E coli bacteria are the basis of swim bans. The IL EPA uses the number and duration of swim bans to assess whether or not the beaches support designated uses for primary contact recreation.
- The North Branch Watershed Workgroup (NBWW) monitors water quality in the North Branch Chicago River and tributaries to accurately identify the quality of the river ecosystems as well as stressors associated with non-attainment of water quality standards and designated uses. Monitoring data will allow for a greater understanding of the water quality impairments, identify priority restoration activities, and track water quality improvements. The Workgroup is committed to an approach for attaining water quality standards that focuses on stakeholder involvement, monitoring, and locally led decision-making based on sound science. Comprehensive baseline monitoring has been completed at all 25 sites for water column chemistry. The NBWW will continue to support the North Branch Watershed Planning Committee and the North Branch Watershed Consortium through regular discussion at general meetings. An annual water chemistry monitoring report was submitted to Illinois EPA on behalf of NBWW members for 2023 monitoring on January 23, 2024, and for 2024 monitoring on February 12, 2025, which covers the NPDES II monitoring requirements for MS4 communities that are NBWW members. The NBWW continues to progress on developing a NBWW Nutrient Assessment Reduction Plan (NARP) based on the NBWW NARP Workplan submitted to the Illinois EPA on December 31, 2021. Progress made on the NBWW NARP is summarized in the annual water chemistry monitoring report submitted to the Illinois EPA. The NBWW completed a 2018-2023 Water Quality Summary Report for NBWW members to utilize to assess water quality trends for different water quality parameters. The NBWW has continued to coordinate with the Illinois EPA on the progress of the NBWW NARP Workplan and NARP development (deadline December 31, 2025). Current NBWW member list is located at ([URL hyperlink](#)).

Part D. MS4 Summary of Year 23 Stormwater Activities

Please note that IEPA has NOT issued a new version of its General NPDES Permit No. ILR40 (Permit). The Permit that became effective March 1, 2016 is in administrative continuation as release of this template. According to the Permit, MS4s have 180 days from the effective date of the Permit to comply with any changes or new provisions contained in the Permit. Accordingly, the MS4s must either have updated their SMPP to comply with the new permit conditions or include a detailed description of how they have modified their stormwater management programs to comply with any changes or new provisions contained in the Permit. MS4s may indicate that in the event a new ILR40 permit is released then the MS4 will work toward updating its program.

The table below indicates the stormwater management activities that the MS4 plans to undertake during Year 23. Additional information about the stormwater management activities that the MS4 will perform is provided in the section following the table.

Note: “X” indicates BMPs that will be implemented during Year 23
✓ indicates BMPs that may change during Year 23

Stormwater Management Activities, Year 23

As described in Part B above, a significant enhancement to the SWMP is the inclusion of Chapter 3.1 Qualified Local Program. On behalf of all MS4s within the county, SMC performs activities related to each of the six minimum control measures which are described in detail in the SWMP. These BMPs, implemented at the county level, make significant strides in achieving the statutory goal of reducing the discharge of pollutants to the MEP as watershed boundaries are not constrained by municipal borders. As such, a significant portion of the stated MS4 measurable goals are to support QLP efforts.

During Year 23, the MS4 plans to continue to support and supplement QLP efforts, as described in detail in the MS4's SWMP and in brief below.

The MS4's NPDES Program can be viewed at <https://www.gha-engineers.com/ms4/documentation/>

A. Public Education and Outreach

In addition to the extensive QLP efforts, the MS4 utilizes a variety of methods to educate and provide outreach to the public about the importance of managing pollutants that potentially could enter the stormwater system. The MS4's Public Education and Outreach program includes: GHA website, outreach events and by supporting efforts of the Solid Waste Agency of Lake County (SWALCO).

Measurable Goal(s):

- Support QLP efforts.
- Implement BMPs and track progress of BMP implementation, as described in the SWMP.

B. Public Participation/Involvement

In addition to the extensive QLP efforts, the MS4 utilizes a variety of methods to allow input from citizens during the development and implementation of the SWMP. The MS4's Public Participation/Involvement program includes the following: maintaining a process for receiving and processing citizen input/complaints; attending and publicizing stakeholder meetings and the Lake County Municipal Advisory Committee, identification of environmental justice areas, and presenting program information at a public meeting at least once annually.

Measurable Goal(s):

- Support QLP efforts.
- Implement BMPs and track progress of BMP implementation, as described in the SWMP.

C. Illicit Discharge Detection and Elimination

In addition to the extensive QLP efforts, the MS4 will conduct activities toward the identification and removal of direct connections of pollutants into the storm water management systems (including wetlands and receiving waters). The program includes the following primary components.

- An outfall map showing the locations of outfalls and the names and locations of all waters that receive discharges from those outfalls;
- An ordinance that prohibits all non-storm water discharges into the storm sewer system and provides the authority for appropriate procedures and actions;
- A plan to detect and address all non-stormwater discharges, into the storm sewer system;

- Periodic inspection of outfalls for detection of non-stormwater discharges and illegal dumping (5-yr rescreening schedule).
- Annual inspection of all High Priority Outfalls.

Measurable Goal(s):

- Support QLP Efforts.
- Implement BMPs and track progress of BMP implementation, as described in the SWMP.

D. Construction Site Runoff Control

Lake County has adopted a countywide Watershed Development Ordinance (WDO) that establishes the minimum stormwater management requirements for development in Lake County. The WDO establishes countywide standards for runoff maintenance, detention sites, soil erosion and sediment control, inspections, water quality, wetlands, and floodplains. The WDO, which is administered and enforced within the community by SMC, establishes standards for construction site runoff control.

Measurable Goal(s):

- Implement BMPs and track progress of BMP implementation, as described in the SWMP.
- Assist SMC in ensuring that all applicable developments are in compliance with the WDO. .

E. Post-Construction Runoff Control

This does not apply to the MS4 as they do not own any facilities and/or machinery.

F. Pollution Prevention/Good Housekeeping

This does not apply to the MS4 as they do not own any facilities and/or machinery.

Part E. Notice of Qualifying Local Program

The Lake County Stormwater Management Commission (SMC) serves as a Qualifying Local Program (QLP) for MS4s in Lake County. In accordance with IL EPA's General NPDES Permit No. ILR40, as a QLP, SMC performs activities related to each of the six minimum control measures. This part of the Annual Report, which summarizes the stormwater management activities performed by SMC as a QLP, consists of the following five sections:

- **Part E1** identifies changes to Best Management Practices (BMPs) that occurred during Year 22 and includes information about how these changes affected the QLP's stormwater management program.
- **Part E2** describes the stormwater management activities that the QLP performed during Year 22.
- **Part E3** summarizes the information and data collected by the QLP during Year 22.
- **Part E4** describes the stormwater management activities that the QLP plans to undertake during Year 23.
- **Part E5** lists the construction projects conducted by the QLP during Year 22.

Part E1. QLP Changes to Best Management Practices, Year 22

Part E2. QLP Status of Compliance with Permit Conditions, Year 22

IL EPA issued its General NPDES Permit No. ILR40 effective March 1, 2016 (the first day of Year 14). SMC reviewed the permit, compared it to the previous permit, summarized the changes, and evaluated what the changes appear to mean for Lake County MS4s. Based on these findings, SMC revised its SMPP template that it provides to Lake County communities in August 2016; the final draft was provided in November 2016. SMC has provided annual updates to the Annual Facilities Inspection Report template since 2016.

Please note the permit effective on March 1, 2016, expired on February 28, 2021, and is currently being administratively continued by the IL EPA. In order to comply with the General NPDES Permit No. ILR40 issued in 2016, the Year 22 Annual Reporting Template includes updates on SMC QLP activities, DRWW and NBWW activities, and various text references of the 2016 permit.

The Lake County Stormwater Management Commission (SMC) serves as a Qualifying Local Program (QLP) for MS4s in Lake County. In accordance with IL EPA's NPDES General Permit No. ILR40, as a QLP, SMC performs activities related to each of the six minimum control measures. The stormwater management activities that the QLP performed during Year 22 are described below.

A. PUBLIC EDUCATION AND OUTREACH

A.1 Distributed Paper Material

Measurable Goal(s):

- Distribute informational materials from the “take away” rack at SMC. Upon request, distribute materials directly to municipalities for local distribution.

Year 22 QLP activities:

- SMC distributed a variety of informational materials related to stormwater management through its “take away” rack and website.
- Upon request, informational materials are distributed directly to Lake County MS4s in PDF format for use on community websites, in community newsletters, and in community “take away” racks.
- During Year 22 SMC distributed over 2,100 paper informational materials during public outreach, community events, stakeholder meetings, and its “take-away” rack. The materials consisted of a variety of topics related to stormwater management, water quality, flood mitigation, and winter best management practices.

A.2 Speaking Engagement

Measurable Goal(s):

- Provide educational presentations related to Illinois EPA's NPDES Stormwater Program at MAC meetings. Upon request, provide educational presentations related to Illinois EPA's NPDES Stormwater Program to Lake County MS4s.
- Upon request or download “The Big Picture: Water Quality, Regulations & NPDES” to Lake County MS4s.

Year 22 QLP activities:

- SMC continued to provide and make available NPDES related information on our website, social media platforms, and email distribution list.
- SMC continued to provide educational presentations related to Illinois EPA's NPDES Stormwater Program at MAC meetings on April 2, 2024 and November 20, 2024.
- SMC staff hosted the 2024 Homeowners Association Workshop and Vendors Expo on September 12, 2024. SMC staff presented the following topics:
 - Stormwater Facility Maintenance
 - Watershed Management Board Grant Program

- SMC staff presented at the Annual All-Natural Hazard Mitigation Plan meeting held on November 20, 2024
- SMC staff presented at the DECI 101 Webinar: Introduction to the Designated Erosion Control Inspector Program held on January 18, 2025
- SMC staff presented at the Kane-DuPage Soil & Water Conservation District Stream Diversion & Causeways Workshop on a panel January 29, 2025
- SMC staff presented the following topics at the Enforcement Officer-Certified Wetland Specialist (EO-CWS) Workshop on January 22, 2025
 - Permitting for Permeable Surface Development, Artificial Turf Fields, and Permeable Pavements
 - Commercial Solar Farm Development
 - Threatened and Endangered Species Compliance Requirements for WDO Permitting
 - Updates available on Maps Online

A.3 Public Service Announcement

Measurable Goal(s):

- Include public service announcements highlighting community accomplishments related to IL EPA's NPDES Stormwater Program on social media platforms and via email list distributions.
- Post watershed identification signage with Lake County Division of Transportation (LCDOT) on Roads maintained by the LCDOT.

Year 22 QLP activities:

- SMC included announcements highlighting community accomplishments related to IL EPA's NPDES Stormwater Program on its website, in its monthly newsletter, and through other media outlets ([URL hyperlink](#)).
- SMC continued to coordinate with LCDOT on maintaining watershed identification signage on roads maintained by the LCDOT.
- Watershed identification signage is located throughout the county.
 - Signage updates and name change awareness was provided to Lake County residents during SMC meetings and email notifications based on the USGS renaming of Squaw Creek to Manitou Creek in Lake County. Corrected identification signage has been posted throughout the county.

A.4 Community Event

Measurable Goal(s):

- Sponsor or co-sponsor workshop on a topic related to IL EPA's NPDES Stormwater Program.

Year 22 QLP activities:

SMC sponsored or co-sponsored workshops and events on stormwater-related topics, including:

- SMC sponsored the hybrid 2024 Homeowners Association Workshop and Vendor's Expo held on 09/12/2024 (48 In-person and 30 virtual participants)
- SMC co-sponsored nine (9) winter best management practices (de-icing) workshops with over 1,300 participants and one (1) in-person calibration event with sixteen (16) participants in the Northeastern Illinois region:
 - Winter Best Practices (De-icing) Workshop for Public Roads (6): September 17, 2024 (In-person), September 24, 2024 (In-person), October 3, 2024 (In-person), October 8, 2024 (virtual), October 15, 2024 (virtual), and November 19, 2024 (virtual).
 - Winter Best Practice (De-icing) Workshop for Parking Lots and Sidewalks (3): September 26, 2024 (virtual), October 1, 2024 (In-person), and November 13, 2024 (virtual).
 - Lake County Calibration Event (In-person): October 23, 2024
- SMC sponsored an education table for It's Our Fox River Day (IOFRD) Port Barrington RiverFest on 9/21/2024. Two (2) SMC staff participated; fifty-four (34) attendees visited the education table during the course of the event.

- SMC sponsored one (1) DECI 101 Webinar held on 1/18/2025 (88 participants), one (1) Designated Erosion Control Inspector (DECI) Workshop held on 2/11/2025 (320 participants), and one (1) Make-Up DECI Workshop on 3/21/2024 (59 participants).
- SMC sponsored one (1) hybrid Enforcement Officer & Certified Wetland Specialist Workshop held on 01/22/2025 (28 In-person and 113 virtual participants).

A.5 Classroom Education

Measurable Goal(s):

- Develop and compile information for stormwater educational kit for distribution upon request.
- Provide materials and training on storm sewer inlet stenciling kits to teachers upon request.

Year 22 QLP activities:

- SMC continued to offer educational stormwater materials.

A.6 Other Public Education

Measurable Goal(s):

- Maintain and update the portion of the SMC website dedicated to IL EPA's NPDES Stormwater Program with resource materials such as model ordinances, case studies, brochures, and web links.

Year 22 QLP activities:

- As new information and resource materials become available, they are posted to the SMC website and/or distributed directly to Lake County MS4s, ([URL hyperlink](#)).
- SMC continued to update and maintain an ArcGIS geospatial web tool for Lake County MS4 programs that indicates TMDL, 303(b), 305(d), HUC-12 watershed information and other information within an MS4 defined boundary, ([URL hyperlink](#)).
- SMC maintained an ArcGIS geospatial web tool for Lake County watersheds where inventoried, allowing the public to see inventory's of ravine, stream and detention basin information ([URL hyperlink](#)).
- SMC maintained an ArcGIS geospatial web tool for Lake County Des Plaines River Watershed Water Quality Improvement Project recommendations, ([URL hyperlink](#)).
- SMC maintained an ArcGIS geospatial web tool for Lake County North Branch Chicago River Watershed Water Quality Improvement Project recommendations, ([URL hyperlink](#)).
- SMC maintained reference documents for stormwater best practices, BMPs and green infrastructure practices on its website, ([URL hyperlink](#)).
- SMC continued to make available via the Lake County SMC website, Community Awareness Illicit Discharge Education and Elimination Videos. The online videos are available in English and Spanish; English version, ([URL hyperlink](#)); Spanish version ([URL hyperlink](#)).
- SMC staff maintained a webpage reference resource to Lake County citizens and organizations. The website identifies a list of potential funding sources that communities can utilize and pursue based on the function and characteristic of their project goals: last updated August 2023 ([URL hyperlink](#)).
- SMC made the following videos available to the public on its County YouTube channel:
 - Park City Capital Improvement Project Finalized – June 10, 2024 ([URL hyperlink](#))
 - Sylvan Lake Dam Modifications Ceremonial Groundbreaking ([URL hyperlink](#))
 - Sylvan Lake Dam Modifications Ceremonial Groundbreaking – Full Version ([URL hyperlink](#))
 - SMC INFLOW Webinar Tutorial ([URL hyperlink](#))
 - 2024 Homeowner Association Workshop ([URL hyperlink](#))
 - SMC 2024 Homeowners Association Workshop Quick Clip ([URL hyperlink](#))
 - A How-to Calibration Event for Winter Maintenance Vehicles ([URL hyperlink](#))
 - Winter Maintenance and Best Practices Annual Workshop Explained ([URL hyperlink](#))
 - Round 2.0 DCEO Grants in Action ([URL hyperlink](#))
 - 2025 Designated Erosion Control Inspector 101 Training ([URL hyperlink](#))

- SMC distributed (11) Mainstream Newsletter via email distribution to 52,464 recipients with an opening rate of 54%.
- SMC distributed (9) NPDES related informational emails to 1,908 recipients with an opening rate of 73%.
- SMC distributed (78) stormwater related informational emails to 255,245 recipients with an opening rate of 66%.
- SMC continues to maintain website outreach to the Lake County Community.
 - The following SMC webpages had the following visitors in Year 22:
 - Stormwater Management Commission | Lake County, IL- 7,399 total views
 - Local Watersheds | Lake County, IL- 1,010 views
 - Watershed Development Ordinance Program | Lake County, IL- 3,476 views
 - Stormwater Best Practices | Lake County, IL- 955 views
 - National Pollution Discharge Elimination System (NPDES) Phase II | Lake County, IL- 185 views

B. PUBLIC PARTICIPATION/INVOLVEMENT

B.1 Public Panel

Measurable Goal(s):

- Provide notice of public meetings on SMC website. Track number of meetings conducted.

Year 22 QLP activities:

- Notice of all public meetings continued to be provided on the SMC website and through direct mailings and e-mailings to distribution lists.
- SMC tracked the number of Stormwater Management Committee (SMC) Board meetings, Technical Advisory Committee (TAC) meetings, Municipal Advisory Committee (MAC), and Watershed Management Board (WMB) meetings conducted during Year 22. Per records, there were (10) SMC Board meetings, (4) TAC meetings, (2) MAC meetings, and (1) WMB meetings were conducted.
- 4 CIRS community inquiries were received and processed by SMC staff.

B.3 Stakeholder Meeting

Measurable Goal(s):

- Provide notice of stakeholder meetings on SMC website.
- Track number of watershed planning committee meetings conducted.
- Establish watershed planning committees for each new watershed planning effort.

Year 22 QLP activities:

- Notice of all stakeholder meetings continued to be provided on the SMC website and e-mails to stakeholder lists.
- SMC hosted two (2) public meetings informing stakeholders of the update of the Lake County Comprehensive Stormwater Management Plan.
- SMC tracked the number of stakeholder meetings conducted for the various watershed planning committees during the reporting period. The list below summarizes the watershed planning committee meetings that were conducted during Year 22:
 - Des Plaines River Watershed Workgroup held two (2) General Membership meetings – August 15, 2024, and February 20, 2025. Including (8) Executive Board, (8) Monitoring Committee, and (3) Lakes Committee meetings.
 - Des Plaines River Watershed Workgroup released a newsletter in May 2024 & an annual accomplishments January 2025.
 - North Branch Chicago River Watershed Workgroup held two (2) General Membership meetings – August 14, 2024 and February 19, 2025. Including (8) Executive Board and (6) Monitoring Committee meetings.
 - North Branch Chicago River Watershed Workgroup released a newsletter in January 2025.

- SMC continued to establish and/or assist watershed planning committees for each new watershed planning effort.

B.6 Program Coordination

Measurable Goal(s):

- Track number of MAC meetings conducted during Year 22.
- Prepare annual report on Qualifying Local Program activities at end of Year 22.

Year 22 QLP activities:

- SMC tracked the number of Municipal Advisory Committee (MAC) meetings: According to records, there were (2) MAC meetings conducted during this reporting period (04/02/2024 and 11/20/2024).
- The stormwater management activities that SMC performed as a QLP are described in the Annual Facility Inspection Report (i.e., Annual Report) template provided to Lake County MS4s.
- The stormwater management activities that SMC plans to perform as a QLP during Year 23 are described in Part E4 of the Year 22 Annual Report template.

C. ILLICIT DISCHARGE DETECTION AND ELIMINATION

C.2 Regulatory Control Program

Measurable Goal(s):

- Continue to enforce the countywide WDO.

Year 22 QLP activities:

- SMC continued to enforce the countywide WDO.
- SMC continued to provide the Lake County Illicit Discharge Detection and Elimination (IDDE) Manual on the SMC website, ([URL hyperlink](#)).

C.10 Other Illicit Discharge Controls

Measurable Goal(s):

- Sponsor or co-sponsor and track the number of attendees at an Illicit Discharge Detection and Elimination workshop or other training workshop related to IL EPA's NPDES Stormwater Program.

Year 22 QLP activities:

- SMC sponsored or co-sponsored trainings, workshops, and events on stormwater-related topics. Such training, workshops, and events are described below.
- SMC continues to make available the Excal Visual "IDDE - A Grate Concern" software to Lake County MS4s. During the reporting period there were four (4) registrants.
- SMC continued to make available on the Lake County SMC website, Community Awareness Illicit Discharge Education and Elimination Training Videos. The online videos are available in English and Spanish; English version, ([URL hyperlink](#)); Spanish version ([URL hyperlink](#)).

D. CONSTRUCTION SITE RUNOFF CONTROL

D.1 Regulatory Control Program

Measurable Goal(s):

- Continue to enforce the countywide WDO.
- Administer the Designated Erosion Control Inspector (DECI) program outlined by the WDO.

Year 22 QLP activities:

- SMC continued to enforce the countywide WDO.
- SMC continued to administer the Designated Erosion Control Inspector (DECI) program as outlined by the WDO, ([URL hyperlink](#)).
 - Total DECI's who have passed the exam (to date): 956.
 - DECI's who have passed the exam between 03/01/2024 – 03/01/2025: 40.
 - Total listed DECI's (to date): 249 (DECI completed certification process).
 - DECI's have a recertification process every three (3) years. Current cycle 2023-2026.

D.2 Erosion and Sediment Control BMPs

Measurable Goal(s):

- Continue to enforce the countywide WDO.

Year 22 QLP activities:

- SMC continued to enforce the countywide WDO.
- SMC continued to provide technical guidance and reference materials to support the administration and enforcement of the countywide WDO.
- SMC staff distributed 50 precipitation weather notifications. The rainfall reports indicate county rain events with observed precipitation for guidance on construction site runoff SE/SC inspections.

D.3 Other Waste Control Program

Measurable Goal(s):

- Enforce WDO provisions regarding the control of waste and debris at construction sites.

Year 22 QLP activities:

- SMC continued to enforce the countywide WDO.

D.4 Site Plan Review Procedures

Measurable Goal(s):

- Track number of enforcement officers who have passed the exam.
- Track number of communities that undergo a performance review.
- Complete ordinance administration and enforcement.

Year 22 QLP activities:

- SMC continued to track the number of enforcement officers (EOs) who have passed the EO exam and have become EOs. Per records, as of the end of Year 22, there are 28 EOs certified in Lake County.
- The list of EOs representing Certified Communities is continually updated and is maintained on the SMC website, ([URL hyperlink](#)).
- In accordance with the amended countywide WDO, the certification process is every 5 years, ([URL hyperlink](#)). The community re-certification process includes a performance review of all 53 certified and non-certified communities for permitted development compliance.
- SMC continued to update the website to include guidance information to supplement WDO interpretation as well as ordinance administration and enforcement.

D.5 Public Information Handling Procedures

Measurable Goal(s):

- Track number of complaints received and processed related to soil erosion and sediment control (SE/SC).

Year 22 QLP activities:

- SMC continues to track the number of complaints received and processed related to soil erosion and sediment control as a component of inspections.

D.6 Site Inspection/Enforcement Procedures

Measurable Goal(s):

- Track number of site inspections conducted by SMC.

Year 22 QLP activities:

- SMC continues to track the number of site inspections conducted by SMC staff.
- According to records, 907 site inspections were conducted by SMC staff.

E. POST-CONSTRUCTION RUNOFF CONTROL

E.2 Regulatory Control Program

Measurable Goal(s):

- Continue to enforce the countywide WDO.

Year 22 QLP activities:

- SMC continued to enforce the countywide WDO.

E.3 Long Term O&M Procedures

Measurable Goal(s):

- Continue to enforce the countywide WDO.

Year 22 QLP activities:

- SMC continued to enforce the countywide WDO.

E.4 Pre-Construction Review of BMP Designs

Measurable Goal(s):

- Continue to enforce the countywide WDO.

Year 22 QLP activities:

- SMC continued to enforce the countywide WDO.

E.5 Site Inspections During Construction

Measurable Goal(s):

- Continue to enforce the countywide WDO.

Year 22 QLP activities:

- SMC continued to enforce the countywide WDO.

E.6 Post-Construction Inspections

Measurable Goal(s):

- Continue to enforce the countywide WDO.

Year 22 QLP activities:

- SMC continued to enforce the countywide WDO.

E.7 Other Post-Construction Runoff Controls

Measurable Goal(s):

- Conduct annual Watershed Management Board (WMB) meeting.
- Contribute funding to flood reduction and water quality improvement projects, including stormwater retrofits, through the WMB.

Year 22 QLP activities:

- The annual WMB meeting was held on November 20, 2024.
- At the annual WMB meeting, eight (8) Projects were selected to receive \$189,150 of funding through the SMC grant program. These projects include planning and in-the-ground project efforts that support flood hazard reduction, drainage and water quality improvement, and stormwater retrofit projects.
 - 8 WMB project grants awarded.
 - 2 projects referred to the Stormwater Infrastructure Repair Fund (SIRF) grant program for funding.
 - 2 projects referred to the Maintenance program for funding.

F. POLLUTION PREVENTION/GOOD HOUSEKEEPING

F.1 Employee Training Program

Measurable Goal(s):

- Provide list of available resources to MS4s.
- Sponsor or co-sponsor employee training workshops or events.
- Make available the Excal Visual “Storm Watch: Municipal Stormwater Pollution Prevention Everyday Best Management Practices” training video and testing.
- Make available the Excal Visual “IDDE - A Grate Concern” training video and testing.

Year 22 QLP activities:

- SMC continued to provide information on training opportunities and training resources for Lake County MS4s.
- SMC continued to make available the Excal Visual “Storm Watch Municipal Stormwater Pollution Prevention” software to Lake County MS4s. During the reporting period there were five (5) registrants.

- SMC continued to make available the Excal Visual “IDDE - A Grate Concern” software to Lake County MS4s. During the reporting period there were four (4) registrants.

F.5 Flood Management/Assess Guidelines

Measurable Goal(s):

- Track number of projects that are reviewed for multi-objective opportunities.

Year 22 QLP activities:

- SMC continued to evaluate all SMC-sponsored projects for multi-objective opportunities, such as flood control and water quality.

F.6 Other Municipal Operations Controls – Winter Roadway De-Icing

Measurable Goal(s):

- Advise MS4 communities of watershed groups addressing issues associated with the use of chlorides (i.e. road salt).

Year 22 QLP activities:

- SMC co-sponsored nine (9) winter best management practices (de-icing) workshops with over 1,000 participants and one (1) in-person calibration event with sixteen (16) participants in the Northeastern Illinois region.
- SMC continued to make available chloride reduction documents.
 - Too Much Salt in Our Winter Maintenance Recipe - Tips for Managing Snow and Ice at Home, ([URL hyperlink](#)).
 - Lake County Winter Parking Lot and Sidewalk Maintenance Manual, ([URL hyperlink](#)).
 - Winter Maintenance Practices and the Environment ([URL hyperlink](#))
 - Less Salt Equals Less Money, Clean Water, Safe Conditions - Tips for Effective Road Salting, ([URL hyperlink](#)).

Part E3. QLP Information and Data Collection Results, Year 22

The QLP did not collect any monitoring data on behalf of Lake County’s MS4s during Year 22. However, SMC has reviewed information presented by the Illinois EPA (IL EPA) in the Illinois Integrated Water Quality Report and 303(d) List, 2024 Draft and has developed the brief “State of Lake County’s Waters” report provided below.

State of Lake County’s Waters March 2025

This brief report is based on information contained in the Illinois EPA’s 2024 Draft Illinois Integrated Water Quality Report (IIWQR) and Section 303(d) List (dated June 2024) that was partially approved by the U.S. EPA. IL EPA submitted its 2024 Section 303(d) list to the U.S. EPA on October 2, 2024. U.S. EPA evaluated IL EPA’s submission and determined that it was not fully consistent with the requirements of Section 303(d) of the CWA and the U.S. EPA’s implementing regulations. On December 11, 2024, U.S. EPA partially approved and partially disapproved IL EPA’s 2024 303(d) list submission. The purpose of the IIWQR is to provide basic information to Lake County’s MS4 communities on the condition of surface waters within Lake County. More detailed information about the condition of surface waters in Lake County can be found in the Illinois EPA’s 2024 Illinois Integrated Water Quality Report and Section 303(d) List and U.S. EPA's Partial Approval of Illinois' 2024 303(d) List of Impaired Waters.

The IL EPA’s Draft 2024 IIWQR and Section 303(d) List assesses the condition of surface water within streams, inland lakes, and Lake Michigan waters. The IL EPA assessment of surface water conditions is based on a degree of support (attainment) of a designated use within a stream segment, inland lake or within Lake Michigan. Determination of designation is accomplished through an analysis of various types of information: including biological, physicochemical, physical habitat, and toxicity data. Illinois waters are designated for various uses including aquatic life, wildlife, agricultural use, primary contact (e.g., swimming, water skiing), secondary contact (e.g., boating, fishing), industrial use, public and food-processing water supply, and aesthetic quality. When sufficient data is available, the IL EPA assesses each applicable designation as Fully Supporting (Good resource quality), Not Supporting (Fair or Poor resource quality), Not Assessed or Insufficient Information. Uses determined to be Not Supporting are called “impaired,” and waters that have at least one-use assessment as Not Supporting are also called impaired as designated within the 303(d) list.

Streams

An analysis of the 2024 impaired streams to the 2020/2022 impaired streams indicates new pollutants added to four (4) stream segments from the 2024 303(d) list previously not listed in the 2020/2022 303(d) list:

| Assessment ID | Name | Cause | New Use Attainment Impairment Added |
|---------------|--|----------------|-------------------------------------|
| IL_DTK-04 | Nippersink Creek | Cause Unknown | Aquatic Life Use |
| IL_G-08 | Des Plaines River | Cause Unknown | Aquatic Life Use |
| IL_G-08 | Des Plaines River | Fecal Coliform | Primary Contact Use |
| IL_HCCB-05 | West Fork North Branch Chicago River | Cover Loss, pH | Aquatic Life Use |
| IL_HCCC-02 | Middle Fork North Branch Chicago River | Cover Loss, pH | Aquatic Life Use |

An analysis of the 2024 impaired streams to the 2020/2022 impaired streams indicates listed pollutants removed from seven (7) stream segments from the 2024 303(d) list that were previously listed in the 2020/2022 list:

| Table E3.2 Stream Segments: Pollutants removed from 2024 303(d) list, previously listed in 2020/2022 | | | |
|--|--|--|--|
| Assessment ID | Name | Parameter Code Name | Reason for Removal |
| IL_DT-06 | Fox River | Dissolved Oxygen | No standard violation in new data for 2024 cycle |
| IL_DT-22 | Fox River | Chloride, Copper | No standard violation in new data for 2024 cycle |
| IL_DT-22 | Fox River | Fecal Coliform | Segment is Fully Supporting for 2024 cycle |
| IL_DTK-04 | Nippersink Creek | Dissolved Oxygen | No standard violation in new data for 2024 cycle |
| IL_G-08 | Des Plaines River | Dissolved Oxygen | No standard violation in new data for 2024 cycle |
| IL_HCCB-05 | West Fork North Branch Chicago River | Endrin, Flow Alteration, Stream Alteration | No standard violation in new data for 2024 cycle |
| IL_HCCC-02 | Middle Fork North Branch Chicago River | Habitat Alteration, Stream Alteration | No standard violation in new data for 2024 cycle |

Lakes

An analysis of the 2024 impaired lakes to the 2020/2022 impaired lakes indicates new pollutants added to one (1) lake previously not listed in the 2020/2022 303(d) list are located in Lake County:

| Table E3.3 Inland Lakes: Pollutants added to 2024 303(d) list, not previously listed in 2020/2022 | | | |
|---|----------|-------------------|-------------------------------------|
| Assessment ID | Name | Cause | New Use Attainment Impairment Added |
| IL_WGZJ | STERLING | Mercury, Dieldrin | Fish Consumption |

Lake Michigan

Lake Michigan is monitored by the Illinois EPA through the Lake Michigan Monitoring Program. Bordering Cook and Lake Counties, the State of Illinois has jurisdiction over approximately 1,526 square miles of open water, 13 harbors, and 64 shoreline miles of Lake Michigan.

Along Illinois' Lake Michigan coastline, two of the 13 harbors assessed in the 2024 IIWQR and Section 303(d) list are located in Lake County.

| Table E3.4 Use Attainments of Lake Michigan Harbors in Lake County: 2024 data vs. 2020/2022 data | | | | |
|--|---------------------------|---|--|---|
| Assessment ID | Name | 2024 303(d) data | 2020/2022 303(d) data | Summary: |
| IL_QH | North Point Marina Harbor | Fully Supporting: Aquatic Life, Aesthetic Quality, Primary Contact Not Supporting: Fish Consumption Not Assessed: N/A | Fully Supporting: Aquatic Life, Aesthetic Quality Not Supporting: Fish Consumption Not Assessed: Primary Contact | Added in 2024: Fully Supporting Primary Contact |

| | | | | |
|--------|-----------------|---|--|--|
| IL_QZO | Waukegan Harbor | Fully Supporting: Aesthetic Quality, Primary Contact Not Supporting: Aquatic Life, Fish Consumption Not Assessed: N/A | Fully Supporting: Aquatic Life, Aesthetic Quality Not Supporting: Fish Consumption Not Assessed: Primary Contact | Added in 2024: Not Supporting Aquatic Life, Fully Supporting Primary Contact |
|--------|-----------------|---|--|--|

Appendix A-3 of the IIWQR, lists potential causes of impairment in the harbors of Lake Michigan that can include polychlorinated biphenyls (PCBs) and mercury.

| Table E3.5 Causes of Impairment of Lake Michigan Harbors in Lake County: 2020/2022 data | | | | |
|---|---------------------------|---|--|----------------------------|
| Assessment ID | Name | 2024 303(d) data | 2020/2022 303(d) data | Summary: |
| IL_QH | North Point Marina Harbor | Mercury, Polychlorinated biphenyls | Mercury, Polychlorinated biphenyls | No change. |
| IL_QZO | Waukegan Harbor | Mercury, Polychlorinated biphenyls, Temperature | Mercury, Polychlorinated biphenyls, Zinc | Added in 2024: Temperature |

Appendix A-3 of the IIWQR, lists potential causes of impairment to Lake Michigan Shoreline Waters that can include E. coli, polychlorinated biphenyls (PCBs), and mercury. Aquatic Life Use and Aesthetic Quality Use is Not Assessed.

| | | |

| Lake Forest Beach IL_QI-10 | North Point Beach IL_QH-01 | Park Ave. Beach IL_QJ-05 |
| Rosewood Beach IL_QJ | Waukegan North Beach IL_QH-04 | Waukegan South Beach IL_QH-05 |

Figure E3.1

Note: 2024 303(d) GIS data is unavailable for public use. Map represents 2020/2022 303(d) available GIS data.

Monitoring

The **Des Plaines River Watershed Workgroup (DRWW)** monitors water quality in the Des Plaines River and tributaries to accurately identify the quality of the river ecosystems as well as stressors associated with non-attainment of water quality standards and designated uses. The Workgroup's mission is to bring together a diverse coalition of stakeholders to work together to improve water quality in the Des Plaines River and its tributaries in a cost-effective manner to meet Illinois EPA requirements. During the YR22 reporting period, DRWW's monitoring program included Water Quality sampling and analysis at 73 Monitoring Locations for 2024. Analysis and reporting of 2022 fish, habitat, macroinvertebrate, and sediment chemistry were completed June 2024. An annual water chemistry monitoring report was submitted to Illinois EPA on behalf of DRWW members for 2023 monitoring on March 27, 2024, and for 2024 monitoring on March 31, 2025, which covers the NPDES II monitoring requirements for MS4 communities that are DRWW members. The DRWW submitted the DRWW Nutrient Assessment Reduction Plan (NARP) to the Illinois EPA on December 29, 2023, and looks forward to continuing discussions with the Illinois EPA during this next phase. Current DRWW member list is located at ([URL hyperlink](#)).

The **North Branch Chicago River Watershed Workgroup (NBWW)** monitors water quality in the North Branch Chicago River and tributaries to accurately identify the quality of the river ecosystems as well as stressors associated with non-attainment of water quality standards and designated uses. Monitoring data will allow for a greater understanding of the water quality impairments, identify priority restoration activities, and track water quality improvements. The Workgroup is committed to an approach for attaining water quality standards that focuses on stakeholder involvement, monitoring, and locally led decision-making based on sound science. Comprehensive baseline monitoring has been completed at all 25 sites for water column chemistry. The NBWW will continue to support the North Branch Watershed Planning Committee and the North Branch Watershed Consortium through regular discussion at general meetings. An annual water chemistry monitoring report was submitted to Illinois EPA on behalf of NBWW members for 2023 monitoring on January 23, 2024, and for 2024 monitoring on February 12, 2025, which covers the NPDES II monitoring requirements for MS4 communities that are NBWW members. The NBWW continues to progress on developing a NBWW Nutrient Assessment Reduction Plan (NARP) based on the NBWW NARP Workplan submitted to the Illinois EPA on December 31, 2021. Progress made on the NBWW NARP is summarized in the annual water chemistry monitoring report submitted to the Illinois EPA. The NBWW completed a 2018-2023 Water Quality Summary Report for NBWW members to utilize to assess water quality trends for different water quality parameters. The NBWW has continued to coordinate with the Illinois EPA on the progress of the NBWW NARP Workplan and NARP development (deadline December 31, 2025). Current NBWW member list is located at ([URL hyperlink](#)).

The **LCHD Ecological Services Department** has been collecting water quality data on Lake County lakes since the late 1960s. Since 2000, 176 different lakes have been studied and data collected on temperature, dissolved oxygen, phosphorus, nitrogen, solids, pH, alkalinity, chloride, conductivity, water clarity, the plant community and shoreline characteristics. Lake summary reports can be found on the Lake County Health Department website, ([URL hyperlink](#)). This data is used as part of ongoing watershed planning efforts throughout the county, which result in specific programmatic and site-specific recommendations throughout the county. SMC is currently developing an application to assist communities in identifying potential site-specific recommendations within their jurisdictional boundaries.

Part E4. QLP Summary of Year 23 Stormwater Activities

The table below indicates the stormwater management activities that the QLP plans to undertake during Year 23. Additional information about the BMPs and measurable goals that the QLP will implement during Year 23 is provided in the section following the table.

Note: “X” indicates BMPs that will be implemented during Year 23

| Year 23 | | Year 23 | |
|---|---|--|--|
| QLP | | QLP | |
| A. Public Education and Outreach | | D. Construction Site Runoff Control | |
| X | A.1 Distributed Paper Material | X | D.1 Regulatory Control Program |
| X | A.2 Speaking Engagement | X | D.2 Erosion and Sediment Control BMPs |
| X | A.3 Public Service Announcement | X | D.3 Other Waste Control Program |
| X | A.4 Community Event | X | D.4 Site Plan Review Procedures |
| X | A.5 Classroom Education Material | X | D.5 Public Information Handling Procedures |

The Lake County Stormwater Management Commission (SMC) is a Qualifying Local Program for MS4s in Lake County. SMC has been providing services under four of the six minimum control categories since it began implementing a comprehensive, countywide stormwater program in 1991. The revised SMPP template clarifies and emphasizes the significant efforts by SMC related to each of the six minimum control measures. These QLP commitments provide Lake County with a baseline Countywide stormwater management program that can be built upon by each of the individual MS4s.

During Year 23, SMC remains committed to performing a variety of stormwater management activities across the County, these commitments are now specifically outlined in the SMPP template. SMC program is continually evolving, to better assist Lake County MS4s in meeting the requirements of the most recent effective MS4 Permit.

A. PUBLIC EDUCATION AND OUTREACH

SMC will continue to support Lake County MS4s in the development and implementation of their stormwater management programs by performing activities related to the Public Education and Outreach minimum control measure, as described below.

A.1 Distributed Paper Material

SMC compiles, develops, and distributes throughout Lake County a variety of materials related to stormwater management.

Measurable Goal(s):

- Develop and distribute informational materials from “take away” rack at SMC.
- Upon request, distribute informational materials directly to Lake County MS4s for local distribution.

A.2 Speaking Engagement

SMC provides educational presentations related to IL EPA’s NPDES Stormwater Program on a regular basis at Municipal Advisory Committee (MAC) meetings. Upon request, SMC will provide educational presentations related to IL EPA’s NPDES Stormwater Program to Lake County MS4s.

Measurable Goal(s):

- Provide educational presentations related to IL EPA’s NPDES Stormwater Program at MAC meetings.
- Upon request, provide educational presentations related to IL EPA’s NPDES Stormwater Program to Lake County MS4s.

A.3 Public Service Announcement

SMC performs extensive Social Media Outreach & Announcement Activities. Public service announcements related to IL EPA’s NPDES Stormwater Program or Stormwater BMPs are posted periodically on SMC’s social media platforms and sent via email list distributions. SMC also coordinates with the Lake County Department of Transportation (LCDOT) to distribute information regarding watershed identification signage in watersheds where watershed planning activities have occurred or are occurring.

Measurable Goal(s):

- Include public service announcements highlighting community accomplishments related to IL EPA’s NPDES Stormwater Program or stormwater BMPs on social media platforms and via email list distributions.
- Post watershed identification signage in cooperation and collaboration with LCDOT on roads maintained by the Lake County Dept. of Transportation.
- Provide information in its newsletter, via social media (Facebook and Twitter), and through other media outlets ([URL hyperlink](#)).

A.4 Outreach Events

SMC sponsors and co-sponsors educational and technical training workshops on a variety of stormwater management-related topics. Each year, SMC will sponsor or co-sponsor at least one workshop on a topic related to IL EPA’s NPDES Stormwater Program, such as soil erosion and sediment control, illicit discharge detection and elimination, or stormwater best management practices (BMPs) that can be used to protect and improve water quality.

Measurable Goal(s):

- Sponsor or co-sponsor workshop on stormwater-related topics.
- Track workshops and events.

A.5 Classroom Education Material

Upon request, SMC will contribute to the development and compilation of material for inclusion in a stormwater education kit that can be distributed to local students and teachers and/or other local stakeholders. Additionally, upon request, SMC will provide information, materials, and training to local students and teachers and/or other local stakeholders interested in conducting storm drain stenciling.

Measurable Goal(s):

- Upon request, develop and compile materials for inclusion in a stormwater education kit.
- Upon request, provide information, materials, and training to local students and teachers and/or stakeholders interested in conducting storm drain stenciling.

A.6 Other Public Education

SMC maintains a website that contains a variety of materials and resources related to stormwater management. The website provides information about IL EPA’s NPDES Stormwater Program, provides information about stormwater best management practices (BMPs), allows for the download of stormwater management-related publications and documents, provides notices of upcoming meetings and ongoing projects, includes watershed plans and watershed workgroup information, and provides links to a number of other stormwater management-related resources.

Measurable Goal(s):

- Maintain and update the portion of the SMC website dedicated to IL EPA’s NPDES Stormwater Program with resources such as model ordinances, case studies, brochures, and links including information related to climate change.
- Make “The Big Picture: Water Quality, Regulations & NPDES” presentation available to Lake County MS4s.
- Make available via the Lake County SMC website, Community Awareness Illicit Discharge Education and Elimination Videos. The online videos are available in English and Spanish; English version, ([URL hyperlink](#)); Spanish version ([URL hyperlink](#)).

B. PUBLIC PARTICIPATION/INVOLVEMENT

SMC will continue to support Lake County MS4s in the development and implementation of their stormwater management programs by performing activities related to the Public Participation/Involvement minimum control measure, as described below.

B.1 Public Panel

SMC provides procedural guidance and implements its Citizen Inquiry Response System (CIRS) for receiving and acting on information provided by the public regarding post-construction stormwater runoff control. SMC coordinates and conducts public meetings as well as committee meetings that are open to the public.

Measurable Goal(s):

- Implement and provide guidance on existing CIRS procedures.
- Provide notice of public meetings on SMC website.

- Track number of meetings conducted.

B.3 Stakeholder Meeting

SMC is actively involved in watershed planning throughout Lake County. SMC believes that the watershed planning process cannot happen and will not be successful without the input, interest, and commitment of the watershed stakeholders. Watershed stakeholders may include municipalities, townships, drainage districts, homeowner associations, lakes management associations, developers, landowners, and local, county, state, and federal agencies.

Measurable Goal(s):

- Provide notice of stakeholder meetings on SMC website.
- Track number of watershed committee meetings conducted.
- Establish watershed planning committees for each new watershed planning effort.

B.6 Program Involvement

Consistent with Lake County's comprehensive, countywide approach to stormwater management, SMC serves as a Qualifying Local Program (QLP) for all Lake County MS4s. In this role, in 2002, SMC proactively formed the Municipal Advisory Committee (MAC) to provide a forum for representatives of local MS4s, which include municipalities, townships, and drainage districts, to discuss, among other topics, the implementation of IL EPA's NPDES Stormwater Program. SMC will continue to facilitate MAC meetings and will continue to provide general support to Lake County MS4s as they continue to develop and implement their stormwater management programs. SMC will prepare an annual report on its stormwater management activities and will provide guidance to Lake County MS4s in preparing their own annual reports.

Measurable Goal(s):

- Track number of MAC meetings conducted.
- Prepare annual report template for use by Lake County MS4s including a description of the Qualifying Local Program stormwater management activities.
- Prepare/maintain SMPP template for use by Lake County MS4s in creating their own SMPP.

C. ILLICIT DISCHARGE DETECTION AND ELIMINATION

SMC will continue to support Lake County MS4s in the development and implementation of their stormwater management programs by performing activities related to the Illicit Discharge Detection and Elimination minimum control measure, as described below. Note, however, that the primary responsibility for the implementation of the Illicit Discharge Detection and Elimination minimum control measure lies with the MS4.

Measurable Goal(s):

- Continue to make available information regarding prioritization of outfalls for illicit discharge screening activities.
- Continue to make available compiled GIS data related to the County's existing stormwater infrastructure (e.g. storm sewer atlases, stream inventories and detention basin inventories).

C.2 Regulatory Control Program

SMC provides local MS4s with model and example illicit discharge ordinances that prohibit all non-stormwater discharges, including illegal dumping, to the storm sewer system. Additionally, the WDO includes provisions that prohibit illicit discharges to the storm sewer system during construction (i.e., prior to final site stabilization) on development sites.

Measurable Goal(s):

- Provide model and example illicit discharge ordinances to Lake County MS4s.
- Continue to administer and enforce the WDO.

C.10 Other Illicit Discharge Controls

SMC regularly sponsors and co-sponsors educational and technical training workshops on a variety of stormwater management-related topics.

Measurable Goal(s):

- Sponsor or co-sponsor and track the number of attendees at an Illicit Discharge Detection and Elimination workshop or other training workshop related to IL EPA's NPDES Stormwater Program.
- Distribute informational materials about the hazards of illicit discharges and illegal dumping from "take away" rack at SMC and SMC website.

D. CONSTRUCTION SITE RUNOFF CONTROL

Lake County has adopted a countywide Watershed Development Ordinance (WDO) that establishes the minimum stormwater management requirements for development in Lake County, including requirements for construction site runoff control.

D.1 Regulatory Control Program

The WDO is the regulatory mechanism that requires the use of soil erosion and sediment controls on development sites throughout Lake County. SMC has also created a Designated Erosion Control Inspector (DECI) program, a program designed to closely mirror the inspection requirements of IL EPA's General NPDES Permit No. ILR10.

Measurable Goal(s):

- Continue to administer and enforce the WDO.
- Continue to administer the Designated Erosion Control Inspector (DECI) program outlined by the WDO.

D.2 Erosion and Sediment Control BMPs

§600 of the WDO specifies the soil erosion and sediment control measures that must be used in conjunction with any land disturbing activities conducted on a development site. SMC maintains technical guidance resources and documents to accompany the WDO.

Measurable Goal(s):

- Continue to administer and enforce the WDO.
- Continue to maintain technical guidance documents.

D.3 Other Waste Control Program

The WDO includes several provisions that address illicit discharges generated by construction sites. The applicant is required to prohibit the dumping, depositing, dropping, throwing, discarding, or leaving of litter and construction material and all other illicit discharges from entering the stormwater management system.

Measurable Goal(s):

- Continue to administer and enforce the provisions of the WDO related to the control of waste and debris during construction on development sites.

D.4 Site Plan Review Procedures

A community's designated enforcement officer is responsible for reviewing and permitting development plans and for administering and enforcing the provision of the WDO. Within certified communities the responsibility lies with the MS4; within non-certified communities the designated enforcement officer is SMC's chief engineer. SMC administers this enforcement officer program, providing training on an as-needed basis to all enforcement officers to assist them in passing the exam, and maintains an up-to-date list identifying each community's designated enforcement officer. In addition to administering the enforcement officer program, SMC periodically reviews

each community's WDO administration and enforcement records, using the results of such review to evaluate the performance of certified communities and designated enforcement officers.

Measurable Goal(s):

- Administer the Enforcement Officer (EO) program outlined by the WDO.
- Maintain an up-to-date list identifying each community's designated enforcement officer.
- Periodically review each community's WDO administration and enforcement records. Re-Certification Procedure.
- Continue to maintain technical guidance documents.

D.5 Public Information Handling Procedures

SMC provides a number of opportunities for the receipt and consideration of information submitted by the public.

Measurable Goal(s):

- Document and track the number of soil erosion and sediment control-related complaints received and processed by SMC.

D.6 Site Inspection/Enforcement Procedures

Article 11 of the WDO contains both recommended and minimum requirements for the inspection of development sites. Within certified communities, the community's designated enforcement officer is responsible for conducting these inspections; within certified communities, SMC's chief engineer is responsible for conducting these inspections. Article 12 of the WDO specifies the legal actions that may be taken and the penalties that may be imposed if the provisions of the WDO are violated.

Measurable Goal(s):

- Document and track the number of site inspections conducted by SMC.

E. POST-CONSTRUCTION RUNOFF CONTROL

As described above, Lake County has adopted a countywide Watershed Development Ordinance (WDO) that establishes the minimum stormwater management requirements for development in Lake County, including requirements for post-construction runoff control.

E.2 Regulatory Control Program

Proposed stormwater management strategies must address the runoff volume reduction requirements described in §503 of the WDO and must include appropriate stormwater BMPs to address the other applicable post-construction runoff control requirements of the WDO.

Measurable Goal(s):

- Continue to administer and enforce the WDO.

E.3 Long Term O&M Procedures

§401 of the WDO requires that maintenance plans be developed for all stormwater management systems and, §500 further details deed or plat restriction requirements for all stormwater management systems.

Measurable Goal(s):

- Continue to administer and enforce the WDO.

E.4 Pre-Construction Review of BMP Designs

As described above, a community's designated enforcement officer is responsible for reviewing and permitting development plans and for administering and enforcing the provisions of the WDO. This includes a review of the stormwater BMPs that will be used to meet the

the post-construction runoff control requirements of the WDO and adherence to the Runoff Volume Reduction standards of §503.

Measurable Goal(s):

- Continue to administer and enforce the WDO.

E.5 Site Inspections During Construction

As described above in MCM D.6 Article 11 of the WDO contains both recommended and minimum requirements for the inspection of development sites.

Measurable Goal(s):

- Continue to administer and enforce the WDO.

E.6 Post-Construction Inspections

SMC has collaborated on a number of watershed-based plans throughout the County. These watershed plans included a stream and detention basin inventories. The plans also include a list of site-specific best management practices within various communities based on an assessment of these inventories and other data. SMC is currently developing an application to assist communities in identifying potential project sites, recommended in adopted watershed plans, within their jurisdictional boundaries.

Measurable Goal(s):

- Continue to administer and enforce the WDO.
- Develop an application, for use by MS4s, to identify adopted watershed plan recommendations within their communities.
- Watershed Planning Status Map, ([URL hyperlink](#)).
- Lake County Watershed Based Plans, ([URL hyperlink](#)).

E.7 Other Post-Construction Runoff Controls

Through the Watershed Management Board (WMB), SMC provides partial funding for flood damage reduction and surface water quality improvement projects. The WMB, which includes representatives from the Lake Michigan, North Branch of the Chicago River, Fox River, and Des Plaines River watersheds, meets annually to review potential projects and to make recommendations on BMP project funding for stormwater. Members of the WMB include chief municipal elected officials, township supervisors, drainage district chairmen, and county board members from each district found within each of Lake County's four major watersheds. The goal of the WMB program is to maximize opportunities for local units of government and other groups to have input and influence on the solutions used to address local stormwater management problems. Previous WMB-funded projects have reduced flooding, improved surface water quality, and enhanced existing stormwater management facilities throughout Lake County.

Measurable Goal(s):

- Conduct annual WMB meeting.
- Contribute funding to flood damage reduction and water quality improvement projects through the WMB.

F. POLLUTION PREVENTION/GOOD HOUSEKEEPING

SMC will continue to support Lake County MS4s in the development and implementation of their stormwater management programs by performing activities related to the Pollution Prevention/Good Housekeeping minimum control measure, as described below. Note, however, that the primary responsibility for the implementation of the Pollution Prevention/Good Housekeeping minimum control measure lies with the MS4.

F.1 Employee Training Program

SMC will assist Lake County MS4s with the development and implementation of their employee training programs by maintaining a list of known employee training resources and opportunities, making available a software-based employee training program, and providing technical assistance to local MS4s. In addition, each year, SMC will sponsor or co-sponsor training workshops.

Measurable Goal(s):

- Maintain a list of known employee training resources and opportunities.
- Make available the Excal Visual Storm Watch: Municipal Storm Water Pollution Prevention software-based employee training program.
- Make available the Excal Visual IDDE: A Grate Concern software-based employee training program.
- Sponsor or co-sponsor a training workshop related to pollution prevention/good housekeeping or other training workshop related to IL EPA's NPDES Stormwater Program.

F.5 Flood Management/Assess Guidelines

In working toward meeting its primary goals of flood damage reduction and surface water quality improvement, SMC follows a set of stormwater management policies that were created to define its roles and responsibilities for stormwater management in Lake County. One of these policies is to integrate multi-objective opportunities (e.g., flood damage reduction, surface water quality improvement, environmental enhancement) into SMC-sponsored projects. In accordance with this policy, SMC will evaluate all SMC-sponsored projects for multi-objective opportunities.

Measurable Goal(s):

- Track number of SMC-sponsored projects that are reviewed for multi-objective opportunity.

F.6 Other Municipal Operations Controls

SMC develops and distributes chloride reduction documents and materials. Each year, SMC will sponsor or co-sponsor at least one workshop on a topic related to winter de-icing. Lake County also publishes a "Lake County Winter Maintenance Preferred Providers" list. Providers included on this list have successfully completed a Lake County Deicing Training Workshop and passes the associated course exam.

Measurable Goal(s):

- Advise MS4 communities of watershed groups addressing issues associated with the use of chlorides (i.e. road salt).
- Sponsor or co-sponsor at least one workshop on a topic related to winter de-icing.
- Make available chloride reduction documents on take-away racks and the website

Part E5. QLP Construction Projects Conducted During Year 22

| Project Name | Project Size (acres) | Construction Start Date | Construction End Date |
|---|----------------------|-------------------------|-----------------------|
| Park City Flood Mitigation Storm Sewer, Park City | 1.25 | 8/2023 | 9/2024 |
| Talbot Avenue Drainage Improvements, Shields Township | 0.54 | 5/2023 | 9/2024 |
| Wildwood Area Stormwater Infrastructure Improvements, Warren Township | 2.0 | 8/2023 | 9/2024 |
| Sylvan Lake Dam | 0.41 | 6/2024 | Ongoing |
